

I had some apples today.

The label said they were from South Africa.

I wonder where other foods come from?

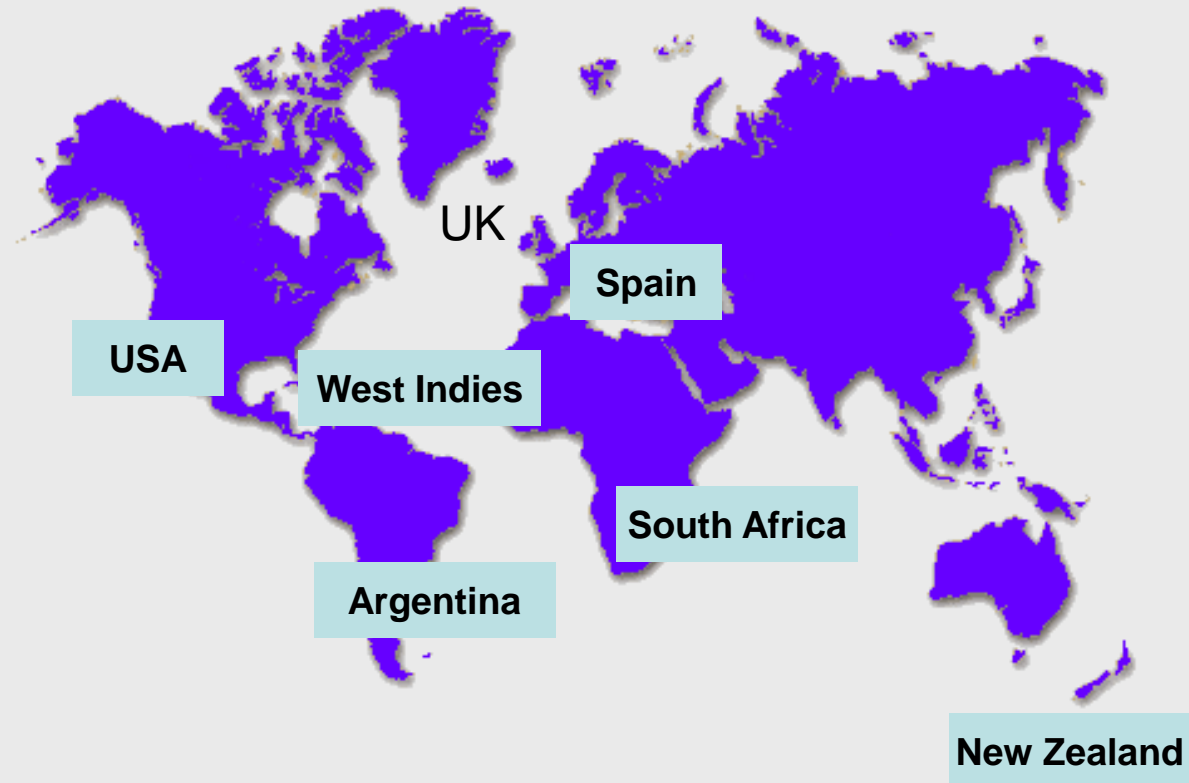

Last slide

Where does lamb come from?

Click on the country.

Excellent.

We do get some of our lamb from New Zealand.

That's a massive 11,000 miles away from the UK.

Some of our food has travelled thousands of miles. That must produce a lot of carbon dioxide and add to climate change.

How could we reduce the carbon dioxide from the food we eat?
