

How big is Your Carbon footprint?

Your Carbon footprint is the way of measuring how much energy and water you use from the whole planet. If you use too much you could be doing things that damage the planet. **Answer the questions by drawing a circle around the answer A,B,C,D. Each of the answers has a score which you add up to make your footprint size.**

<p>Question 1 How do you get to school?</p> <p>A Car. B Foot C Bus. D Bike</p>	<p>ANSWERS CIRCLE 1</p> <p>A = 3 points B = 1 point C = 2 points D = 0 points</p>	<p>Question 2 When no one is watching TV do you</p> <p>A Turn it off B Turn it off most of the time C Turn it on sometimes D Leave it on</p>	<p>ANSWERS CIRCLE 1</p> <p>A= 1 point B= 2 points C= 3 points D= 4 points</p>

23 points + you are a size 10 foot and are stomping on the planet.

16 to 22 points you are a size 8 foot. Still lots of things you can do to help the planet.

10 to 15 Points. A size 6 you are doing some things to save the planet.

Less than 10 Points a size 4 Eco Warrior. Well Done
